RE: Permit Applicability Determination  
SWN Production Company, LLC  
Michael Dunn Pad  
Determination No. PD17 - 022  
Plant ID No. 051-00227

Dear Ms. Suszkowski:

It has been determined that a permit will not be required under 45CSR13 for your proposed changes included in your Permit Determination dated March 31, 2017. This is based on the facts that the facility is currently registered under the G70C General Permit and the changes proposed do not require any changes to the permittee's general permit registration. Additionally, the information included with your application indicates that a permit modification is not required because there is no increase in emissions that will exceed two (2) lbs/hr OR five (5) tons/year of total Hazardous Air Pollutants (HAPs); six (6) lbs/hour AND ten (10) TPY of any regulated pollutant; or, trigger a substantive requirement of any State or Federal air quality regulation.

Please bear in mind, however, that any additional changes to the proposed facility may require a general permit registration modification, or change to an individual permit under 45CSR13. Furthermore, pursuant to 45CSR13-5.14, records briefly describing the proposed change, the pollutants involved, the potential to emit for each pollutant increased or added shall be maintained by the owner or operator for at least two years and made available to the Director upon request.

Should you have any questions, please contact the undersigned engineer at  
(304) 926-0499 ext. 1203.

Sincerely,

Jonathan Carney  
Engineer
